Alarm Monitoring & Polling

Cloud-based Alarm Monitoring & Polling

From the creators of Inform.net, Titan introduces *AMP*™ the fastest, most comprehensive software in the world for Alarm Monitoring and Polling. Among fuel management systems, *AMP* has no equal. Connecting to an IP address or fax modem, *AMP* allows you to manage fuel inventory levels in real time, monitor alarms, optimize alarm response, and manage your ATG gauge configuration for remote resolution of many issues formerly requiring dispatch.

A cloud application, with *AMP* there's no software to buy or install. Simply using an Internet connection you can poll and monitor data from any gauge, anytime.

BENEFITS

- Lightning-Fast Results
- 24/7 Cloud Access
- Real-Time Fuel Inventory
- Comprehensive Analysis
- Remote ATG Management
- Secure & Reliable
