

Environmental Compliance Solutions

Titan's on-demand Web software keeps owners and operators of USTs on top of all operational compliance demands. With Titan you'll know everything you need to do to stay in complete compliance with state, federal, and local regulations. With the click of a mouse you can access important data including tank and sump information, aerial site images, equipment photos, inspection logs, testing results, important upcoming dates, release detection information, UST registrations, regulatory forms and filings, and more. Compliance risk is mitigated through 24/7 alarm monitoring and instant notification. Let Titan put you in total control of your compliance operation.

BENEFITS

- Central Management of Compliance
- Total Visibility & Control
- Streamlined Efficiency & Workflow
- Fewer Fines and NOV's
- Protected Assets
- 24/7 Web Access

Store all your documents, site images, and regulatory forms in one place for central compliance management.

View testing requirements and history. Dispatch testing and generate regulatory reports directly from Titan's system

Track important dates by facility. Generate auto-reminders to key personnel about recurring dates or upcoming deadlines.

Streamline workflow through Titan Mobile Apps that allow site inspections to be conducted and photos taken and imported through a PDA.

"Electronic documents, regulations, permits, certificates, remedial projects—virtually any environmental or compliance driver that affects our enterprise is stored and managed via Titan's software."

Dave Dodson • Compliance Director, Sheetz

KEY FEATURES & FUNCTIONS

UST COMPLIANCE

- Enables complete management of USTs and related equipment
- Stores tank, line, sump, and dispenser detail including make, model, UL, condition, serial number, sensor positioning, photos, warranty, etc
- Tracks environmental activities by site

RELEASE DETECTION MONITORING

- Tracks monthly release detection records and water levels
- Enables automated dispatch of testing

SPILL OVERFILL AND VAPOR RECOVERY

- Shows type of spill and overflow protection; Stage I & II data
- Includes testing requirements, piping type, latest testing information

IMPORTANT DATE MANAGEMENT

- Tracks important dates by facility or company wide
- Auto-reminds key personnel of important upcoming dates by email or text
- Contains a built-in regulatory rules engine that keeps you on top of federal and state testing dates and reporting requirements

CORROSION PROTECTION

- Monitors 30/60-day rectifier readings with reminders and notifications
- Tracks mandated one or three year CP testing
- Monitors impressed current output data for changes that could impact protection

REGULATORY INTERFACE AND REPORTING

- Generates reports that fulfill regulatory reporting requirements
- Allows regulatory forms and reporting letters to be automatically populated with system data
- Triggers e-mails to key personal about upcoming deadlines
- Manages NOVs to resolution

ELECTRONIC DOCUMENT MANAGEMENT

- Acts as a virtual file cabinet for all compliance documentation
- Centrally stores key contact information, testing & inspection results, and related vendor invoices

REPORTING

- Contains basic reports and has the ability to produce highly-customized reports
- Queries allow on-demand access to key documents and data

ALARM MONITORING

- Generates immediate notifications when ATGs are in alarm via email/text
- Allows risk parameters to be set for alarm monitoring
- Compatible with any brand of gauge
